LED Strip IP68   White 24V

The LED Strip IP68 White 24V is engineered for high-impact outdoor environments. This robust and flexible lighting solution is designed to perform in the most demanding conditions while providing a seamless experience layer of patterns and motion. A tight bending diameter of 50mm and custom length options allow the light to effortlessly follow organic shapes and intricate architectural outlines.

With high-quality silicone housing and superior protection ratings, it is the ideal choice for enhancing architectural forms with bold light effects. The durable construction is saltwater, UV, and flame resistant, offering a reliable, long-term solution that maintains its integrity even in harsh coastal environments.

↘ Superior Environmental Durability — Rated IP68 and IK08, this strip is fully protected against dust, prolonged immersion in water, and physical impact.

↘ High-Density Output — Features 120 LEDs per meter to ensure smooth, consistent light distribution across architectural surfaces.
